

## Correlation Between EIA Results and GC-MS TEQ

SITE Program Phase 2 Report Figure 2.

Plot of Method 4025m results versus HRMS results for the site-specific study. The diagonal line represents  $y = x$  (not a regression line). The original graph is found on report page 26. A description of sampling sites is found in section 2.2.1 on report pages 5-6. An overview of testing is found in section 2.3 on report page 7.
